# **VERSAEDGE MOLDING | INSTALLATION METHODS**

## Installation on flooring with an overall thickness of up to 19 mm (0.75").

# Release Paper VersaEdge surface roughened up with sanding sponge or sandpaper. Adhesive Tape\* \*The purpose of the double-sided tape is to secure the molding firmly in place until the premium polyure- thane construction adhesive totally cures.

### Step 1

Install the riser flush to the stair. Clean flooring and molding as directed below:

### **CLEANING PREPARATION FOR BOTH SURFACES**

Preparing the floor and molding will significantly increase the quality of the bond

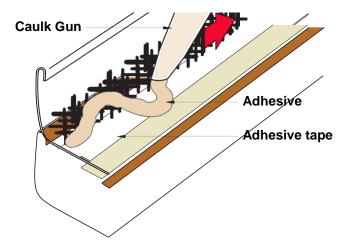

- 1. Use a damp cloth (water only) to clean both surfaces of loose particles or surface films.
- 2. Roughen the surfaces with sandpaper (100-150 grit), sanding sponge or metal brush. For flooring, only roughen up area that will be covered (1.25" to .5")
- Degrease both surfaces to remove all traces of oil, grease and fingerprints by using a solvent such as methyl ethyl ketone (MEK), acetone or isopropyl alcohol.
- 4. Let both surfaces dry thoroughly before applying adhesive

Roughen up surface that come

### Step 2

Turn VersaEdge over and roughen the inside surface of the VersaEdge to increase bond by means of 60 grit sandpaper, sanding sponge, or a metal brush. Then, gently peel the release paper all the way off the adhesive tape.

### Step 3

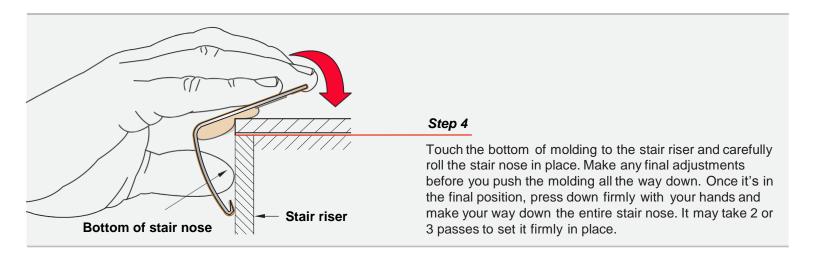

Next, apply a generous bead of a Premium Polyurethane Construction Adhesive along the entire inside corner. Be sure to overlap the tape with the adhesive.

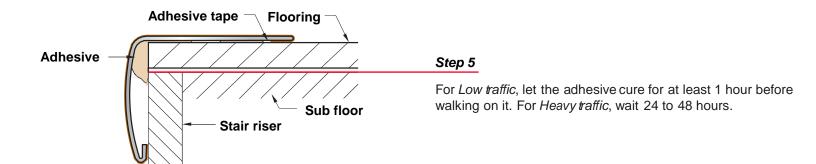

Underside of molding generously covered with adhesive
